BIFIDOBACTERIUM & LACTOBACILLUS

Dear breeders & bird lovers,

whether macaw or zebra finch, one thing connects us all and this is probably the most beautiful hobby in the world - Aviculture. Everyone is constantly striving to optimize the husbandry and diet of their birds in such a way that breeding pairs remain vital for a long time or the most faithful companion shows a magnificently shiny plumage. Ultimately, it's about the well-being of our wild parrots & parakeets and that's exactly what my mission is at

Your Parrot

Our collaboration with the most experienced breeders around the world has made it possible to produce extruded pellets which are ideal for parrots & parakeets, because we all saw the benefits of it. Now, through many years of research, we have the ability to produce extruded pellets that resemble the original diet of many parrots and parakeets in their habitat.

"Whoever stops getting better has stopped being good" Philip Rosenthal

Thank you very much, your Franz Dahlheim

ABOUT US

FOUNDER. FOR GOOD REASONS

Franz Dahlheim has been connected to animals since childhood. However, exotic birds were his passion. The will to offer his parrots more has always been firmly anchored. A trip to Australia changed everything. Because at Down Under (Australian Bush) he saw what parrots really ate. The comparison with commercially available feed showed frightening deficits that occupied him every day from now on.

We attach great importance to the quality of our raw materials. Whenever possible, we source our ingredients locally.

Our products are all created and packaged by hand. We are a small team consisting of 12 employees.

We support endangered bird species such as the Black cockatoos or the Golden-shouldered parrots in Australia.

We work with leading biologists to provide up-to-date information on the diets of wild parrots. We use this knowledge to continuously develop our feed.

wild, crunchy & unique.

FEEDING HABITS IN PARROTS

The fact that parrots inhabit such a wide range of habitats indicates that their food sources are just as diverse. One misconception about parrots is that they are primarily seed eaters. In fact, the first domesticated members of the parrot family were budgerigars and other Australian parrots and parakeets. Cockatiels, Grass parakeets, Ringnecks, Red-rumped Parrots or Lovebirds (Agapornis), which often feed on semi-ripe seeds in their habitat, have fewer problems with a seed-based diet. They adapted well to captivity because seeds, though hard, (while most parrots feed on tender, green immature seeds) were readily available and required no further production steps or unusual storage conditions. The habit of treating all parrots as seed eaters was a fallacy that negatively impacted our parrots' health and feeding habits.

Franz Dahlhei, Founder & CEO:

“Parrots often seem very intelligent to us because they learn so quickly and are curious. What they actually demonstrate is a willingness to adapt these natural traits in human care. The same applies to feeding with seeds.”

THE HERBAL BLEND

This variant is ideal for all birds that originally feed on half-ripe seeds, herbs and other parts of plants (leaves, roots, bark). This mixture contains no fruit (zero sugar) and is a very nutritious food especially for Australian parrots and cockatoos.

VITAL PELLETS

HERBAL BLEND

NATURAL COLOUR: YELLOW 8mm

Product Code: 120918 | 900g

Product Code: 120919 | 3 kg

Product Code: 120920 | 10 kg

INGREDIENTS HERBAL BLEND

Vital Pellets Herbal Blend

Composition: corn, wheat, millet, oats, linseed, dicalcium phosphate, buckwheat, safflower, soya, products from the processing of herbs (curcuma, dandelion, nettle, celery), brewers' yeast, calcium carbonate, peanut oil, salt, carrots

Analytical constituents: protein 11,8%, crude fat 5,3%, crude fibre 4,1%, crude ash 4,7%, calcium 1,11%, phosphorus 0,61%, sodium 0,30g

Additives/KG: Nutritional additives

vitamin A 10.000 IU, beta-carotene (3a160a) 100 mg, vitamin D3 1.000 IU, vitamin E 187.50 mg, vitamin K3 3.75 mg, vitamin B1 19.25 mg, vitamin B2 47.50 mg, niacinamide 60.00 mg, choline chloride 1212.50 mg, calcium-D-pantothenate 92.50 mg, vitamin B6 17.60 mg, folic acid 9.63 mg, vitamin B12 37.50 mcg, vitamin C 750.00 mg, biotin 375.00 mcg, L-carnitine 250.00 mg, L-lysine 4937.50 mg, L-methionine 2425.00 mg, L-threonine 2499.95 mg, L-tryptophan 1937.50 mg, L-valine 40.88 mg, 3b103 (iron) 22.50 mg, 3b201 (iodine) 0.53 mg, 3b405 (copper) 7.20 mg, 3b503 (manganese) 75.00 mg, 3b605 (zinc) 72.00 mg, 3b801 (selenium) 0.15 mg

Zootechnical additives /KG:

Bifidobacterium animalis ssp. animalis DSM16284, Lactobacillus salivarius ssp. Salivarius DSM16351, Enterococcus faecim DSM21913 (4b1890) min. 3.19×10^8 CFU/kg

LOW FAT

A look behind the scenes. Our pellets are produced on state-of-the-art and clean facilities. Our advantage? You know exactly who makes the food for YOUR PARROT.

Overlooked deficiency

Wild parrots spend most of their day foraging, eating a wide variety of buds, flowers, berries, fruits, semi-ripe seeds and nuts to meet their dietary needs. Pet birds also have complex nutritional requirements and as such many suffer from health problems due to nutrient deficiencies. One of the most common questions bird enthusiasts have is whether they should choose seed or pellets as the basis for their bird's diet.

Problems with seed mixtures

Seed mixtures are deficient in 32 essential nutrients. They are very low in vitamin A, which is essential for the ideal functioning of the immune system. If this is not the case, diseases will inevitably occur. Parrots and parakeets that are primarily seed-fed often suffer from undetected calcium deficiencies, as the calcium content of seeds in mixtures is less than 0.1%. Calcium plays an extremely important role in breeding, why? Since the hen needs a lot of calcium during the contraction to eject the eggs. A deficiency can therefore lead to laying difficulties or even death.

A high-fat diet can also contribute to behavioral problems. With a high-carbohydrate, high-fat diet, we also provide the parrots with plenty of energy. If the parrot doesn't have enough opportunities to expend this energy, it can result in some deviant behaviors like screaming and biting. Last but not least, such a diet leads to obesity, which can lead to serious consequences such as liver damage and infertility.

We are different:

- ✓ only 5,3 % fat
- ✓ only 11,8 % protein
- ✓ packed with vegetables, herbs and fruits

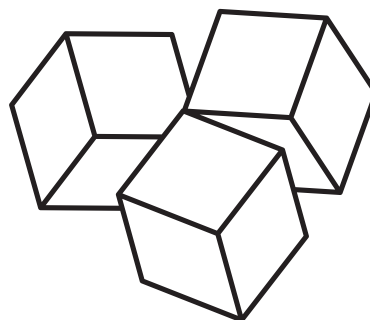

WE LIKE IT NATURALLY. YOUR PARROT TOO.

Very easy. Nature shows us how. That's why we do without the following

The innumerable mixtures of seeds that exist do not really match the original composition of the natural diet of many parrots. They are usually high in fat. lack of calcium. lack of vitamins... YOUR PARROT deserves better.

SOFT EGG FOOD GOLD

This premium egg food is enhanced with gammarus & river shrimps. We have moistened our mixtures with high-quality vegetable oils instead of sugary honey. This supports absorption and digestion. Added probiotic bacteria support the crops of young birds and strengthen the digestive system at the same time also for weak birds.

SOFT EGG FOOD

EGG FOOD GOLD

Product Code: 150492 | 1000g

Product Code: 150493 | 5 kg

Product Code: 150494 | 10 kg

SOFT EGG FOOD EASY

Completely ready to use. You can feed it on its own or mix it with our Vital Pellets to add variety and protein to your bird's diet. Feed it daily during breeding and moulting periods. Eggfood can be given three times a week during the rest period. Our eggfood is well digested by your birds, so you can also feed it to weakened and sick birds to provide them with energy in a simple form.

FEED CLEVER.

In short: we make more out of BIRDFOOD. With our creative and unique mixes, you feed everything at once. It is no longer necessary to laboriously put together feed ingredients which mostly end up on the floor of the aviary anyway. Our mixtures are thought through down to the smallest detail and offer quality at the highest level.

- ✓ no selection
- ✓ balanced vitamins and minerals
- ✓ with high-quality fruit and vegetables
- ✓ 100% feed conversion
- ✓ with probiotic bacteria
- ✓ no risk of fungi, germs & pesticides
- ✓ less fat than traditional blends

YOUR PARROT DESERVES IT.

ALL THE IMPORTANT NUTRIENTS IN ONE PELLET

DIGESTION

Probiotic Bacteria

Improved digestion, enhanced immune function, balanced microflora.

ACTIVITY

Intense Food

Your parrot spends more time feeding and becomes more active.

NO RISKS

Avoid Mold

Our Vital Pellets are free of mould, germs and pesticides.

ALL INCLUSIVE

Fruit & Nutrients

Over 10% fruit and vegetable content enriched with important vitamins, minerals & amino acids.

TROPICAL - CRUNCHY WITHOUT SHELL

Our wild nut mix made from nut kernels such as big peanuts, hazelnuts, almonds, pecan and brazil nuts is an ideal supplementary food for your parrots. You can choose with or without a shell, depending on the strength and taste of your birds. Nuts are a major part of the diet of some species (african grey parrots, macaws, eclectus parrots, black cockatoos, african parrots)
